Subject: Action required: Draft glossary of terms for the claim substantiation documentation

Dear All,

Please find attached the draft for our glossary that contains the input from many of you who kindly reviewed the 1st draft and shared their comments with me. I would appreciate your final review, so we can use this glossary as the basis for our scientific communication and claim substantiation documentation. If I have not received further comments/suggestions from you by the end of this week (02/14/03 EOB), we will file this glossary in the WSA Shared Folder and the claim substantiation document files.
